This is About us.

Based in Prestatyn on the lovely North Wales coast, the sailing club was formed over 30 years ago on land leased from the local authority. The club itself, with its own compound was built and created by its members, who continue to remain dedicated and active in repair, maintenance and improvement.

A newly negotiated lease means that we can continue to operate and provide a top amenity for a range of water enthusiasts who live both locally and in surrounding areas which include Merseyside, Chester, Warrington and as far as Stoke on Trent.

We have various vehicles including a four wheeled drive tractor and dumper to enable us to launch and retrieve our craft at virtually any state of the tide.

The present membership consists of power and fishing boats, some sailing enthusiasts, jet skis and a social membership who just enjoy the surroundings and club amenities. We carefully control our ratios of the various watercraft and all water members have to show a proven comprehensive insurance for the craft they operate. We are unable to launch or recover craft over 17ft in length. We are also unable to accept any new applications for boats and trailers to be kept in the compound, even on a temporary overnight basis. Our financial year begins on January 1st and applications for new memberships are independently considered during February.

As previously stated, our overall membership levels are carefully controlled to enable the club to handle craft quickly and efficiently on lovely summer days and the various days during the year when we have fishing fun days etc and there are numbers of craft using the facilities.
